

# FLIGHT SUMMARY REPORT

**Flight #:** 90-080  
**Date:** 18 May 1990  
**Sensor Package:** Dual HR-732  
Wild-Heerbrug RC-10  
**Area(s) Covered:** Central California Coast

**Investigator(s):** Functional Check Flight  
**Flight Request:** 90X001

**Aircraft #:** 709  
**Julian Date:** 138

## SENSOR DATA

<b>Accession #:</b>	04025	04027
<b>Sensor ID #:</b>	018	026
<b>Sensor Type:</b>	HR-732	RC-10
<b>Focal Length:</b>	24" 609.6 mm	12" 304.97 mm
<b>Film Type:</b>	High Definition Aerochrome IR SO-131	Panatomic-X Aerographic II EK-2412
<b>Filtration:</b>	cc.30B	Wratten-12
<b>Spectral Band:</b>	510-900 nm	510-700 nm
<b>f Stop:</b>	8	4
<b>Shutter Speed:</b>	1/75	1/200
<b># of Frames:</b>	220	69
<b>% Overlap:</b>	60	10
<b>Quality:</b>	Excellent	Excellent
<b>Remarks:</b>		

## Airborne Science and Applications Program

The Airborne Science and Applications Program (ASAP) is supported by three ER-2 high altitude Earth Resources Survey aircraft. These aircraft are operated by the High Altitude Missions Branch at NASA-Ames Research Center, Moffett Field, California. The ER-2s are used as readily deployable high altitude sensor platforms to collect remote sensing and *in situ* data on earth resources, celestial phenomena, atmospheric dynamics, and oceanic processes. Additionally, these aircraft are used for electronic sensor research and development and satellite investigative support.

The ER-2s are flown from various deployment sites in support of scientific research sponsored by NASA and other federal, state, university, and industry investigators. Data are collected from deployment sites in Kansas, Texas, Virginia, Florida, and Alaska. Cooperative international scientific projects have deployed the aircraft to sites in Great Britain, Australia, Chile, and Norway.

Photographic and digital imaging sensors are flown aboard the ER-2s in support of research objectives defined by the sponsoring investigators. High resolution mapping cameras and digital multispectral imaging sensors are utilized in a variety of configurations in the ER-2s' four pressurized experiment compartments.

## Camera Systems

Various camera systems and films are used for photographic data collection. Film types include high definition color infrared, natural color, and black and white emulsions. Available photographic systems are as follows:

- Wild-Heerbrug RC-10 metric mapping camera
  - 9 x 9 inch film format
  - 6 inch focal length lens provides area coverage of 16 x 16 nautical miles from 65,000 feet
  - 12 inch focal length lens provides area coverage of 8 x 8 nautical miles from 65,000 feet
- Hycon HR-732 large scale mapping camera
  - 9 x 18 inch film format
  - 24 inch focal length lens provides area coverage of 4 x 8 nautical miles from 65,000 feet
- IRIS II Panoramic camera
  - 4.5 x 34.7 inch film format
  - 24 inch focal length lens
  - 90 degree field of view provides area coverage of 2 x 21.4 nautical miles from 65,000 feet
